## Adding "User Speed Dials" to a phone

1) Press FEATURE \* 4

Display will read: "**Personal Spd DI**"

Then it will immediately read : "**Enter Code**"

**You MUST Start with "slot" 71 since System Speed Dials are 01 through 70.**

2) Enter 71

Display will read: "**Program and OK**"

3) Enter the phone number you wish to apply to this speed dial slot.

4) Press the OK softkey

Display will read: "**Entry ## Stored**"

**To add additional speed dial numbers, repeat all of the steps, changing your "slot" number each time. You can store a number in each slot number beginning with 71 and ending with 99.**
